

Smart Building Solutions – Cloud-based Software Platform and ELV Technologies

31 October 2019 (Thursday)

5:30 pm - 6:30 pm

Room 109-110, 1/F, Jockey Club Environmental Building, 77 Tat Chee Avenue, Kowloon Tong

(1) Innovative Cloud-based Software Platform and Prop Tech to Optimise Energy Use in Commercial Buildings

Speaker: Mr Alfred Yip, Senior Manager, En-trak

There is an increasing need by cities around the world to manage growing energy costs. **Modern cloud-based operating system** enables building operators to have full visibility, analytics and actionable insights into these data. In this talk, a prop tech company would share with the audience two reference cases:

- How an innovative smart lighting technology helps shopping malls reduce energy consumption;
- Property technologies that enable occupants of commercial buildings to control central air-conditioning and office lighting using a Mobile App.

The prop tech company was a winner of the 2017 Jumpstarter Competition organised by Alibaba HK Entrepreneurs Fund. In 2018, the company further secured investment from the same fund and CLP Innovation Ventures Ltd.

(2) Application of ELV Technologies in the Residential Sector

Speaker: Mr Billy Cheung, Manager of Automation and ELV, ATAL Technologies Ltd

The increased demand for advanced security technologies has extended beyond the commercial sector to residential. This presentation will cover the latest **extra-low voltage (ELV) technologies** introduced to the residential market for enhanced access control and security management. Apart from security systems, home automation is gaining importance. Simplifying household life and daily routines can be done with the use of smart home systems. Innovative technologies enable remote control and configuration of all functions in a smart home, improving quality of life at the fingertip.
